

AMENDMENTS TO THE DRAWING

Please enter the replacement drawing sheet.

REMARKS/ARGUMENTS

RECEIVED
CENTRAL FAX CENTER

JUL 20 2006

I. Specification Changes

The Applicant amends the Specification to provide numerals for the first electrode 152 and second electrode 154. No new matter has been added. These electrodes were clearly discussed in the parent application, 10/432208, which was incorporated by reference into the current application.

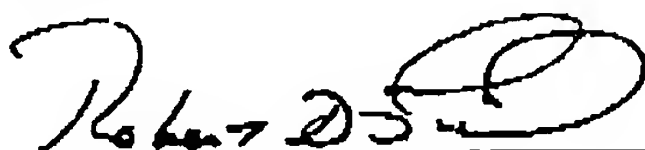

II. Drawing Changes

Figure 1 of the drawing is amended to identify the first electrode as 152 and the second electrode as 154

Conclusion

Claims 1-15 of the pending claims are allowable over the cited art. Claim 1 should have been amended, and previously withdrawn claims 16-20 should have been canceled, by examiner's amendment. All pending claims should now be allowed, and the application in condition for allowance.

Respectfully submitted,
RUTAN & TUCKER
